JCUVA

**Ana Ines Gomez de Castro,
Mikhail Sachkov**

Assigned Organizations

INASAN and UCM are designated organizations by the International Agreements on WSO-UV mission (Ground Segment, Field Camera Unit and Time Sharing Policy) for the science operations of WSO-UV.

The JCUVA hosts the facilities required for conducting the WSO-UV science operations run by Russia and Spain. Its activities also comprise the joint management of the WSO-UV science program.

Common Science

The overlap in scientific interests between staff and students at the UCM and INASAN.

The intention that UCM and INASAN collaborate to pursue joint astrophysical Research projects

The interest of both partners in using the Operation Center to produce world-class science

Advanced training of students

The mutual interest in advanced training of students through the use of professional telescopes, and in astronomy outreach

The UCM proposes to offer the infrastructure at its Edificios Fisac y Pensamiento and its Operation Center for the WSO-UV telescope, which INASAN proposes to use for the operation of the WSO-UV space telescope as well as a training facility for space astronomy and research.
